

HomeWiseDocs.com Announces Systems Integration with Village Management Software (VMS)

Village Management Software (VMS) www.villagemanagementsoftware.com, one of the nation's fastest growing accounting software platforms serving the community management industry and HomeWiseDocs.com www.homewisedocs.com announced today that they have integrated their dynamic technologies to provide a seamless service to the homeowners and real estate community they serve. Data and document integration for products such as demands, estoppels, resale disclosures, questionnaires and inspections offers improved efficiency and quality control for management companies utilizing this technology.

"From our earliest exposure to the community management industry we have been a proponent of adopting integration in our industry to bring us to the level of other service industry peers," stated Manny Chaves, President of HomeWiseDocs.com. He went on to say, "our proud partnership with a leader like VMS assures us that the integration renaissance we see underway is alive well today. This technology not only offers the efficiencies we all seek as profit margins shrink, but also the opportunity for new real estate services products."

Michael Renaldo, President of Team Soft Solutions, the company that offers the VMS product stated that, "all management companies should require this technology for any of the service platforms they utilize within their daily routine. Proprietary systems and systems not designed specifically for our industry will continue to unsuccessfully battle against the platforms that embrace the power of data sharing across product and service lines. Our integration with HomeWiseDocs.com assures our mutual customers that collectively we bring the industry's best real estate services solution to the market."

Jeff Butler, Principal for HomeWiseDocs.com also added, "I am very excited we can now bring this integration to market! We have a large number of mutual clients with VMS and the efficiencies that will be garnered will have a very significant and positive customer service effect across the country."

About Team Soft Solutions and Village Management Software

Village Management Software (VMS), is one of the most technologically advanced and comprehensive property management tools available to date. Utilizing a single, unified Microsoft SQL database, VMS provides interactive, real-time data management encompassing every aspect of the property management world.

VMS is not just a single program, but a suite of management tools including everything from accounting, compliance, collections, and delinquency control, to interactive web modules allowing residents, property managers, board members and vendors to interact and communicate in real time.
